

Motorists be aware that the southbound Interstate 15 traffic lanes will shift left near Rancho Bernardo on Monday, June 11.

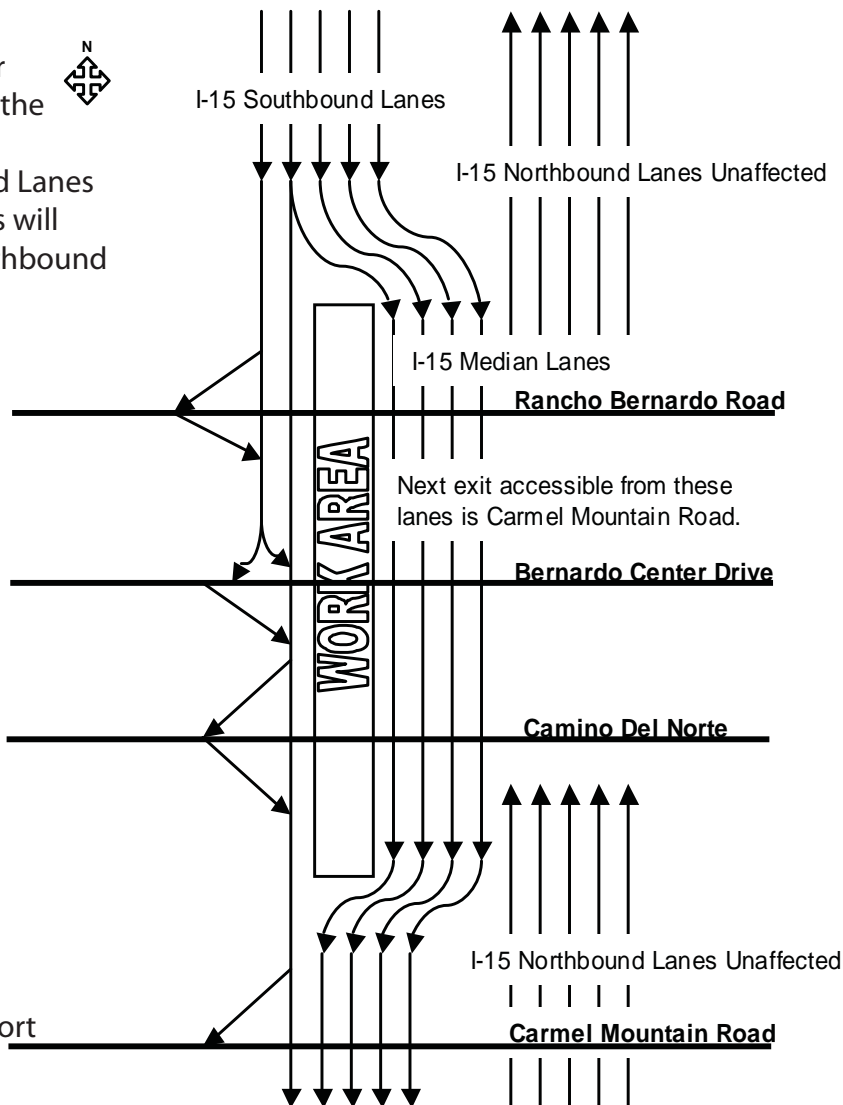

In order to continue with the work that will edge ever closer to the completion of the "Middle Segment" of the Interstate 15 (I-15) Managed Lanes project, Caltrans work crews will be shifting lanes left on southbound I-15, on Monday, June 11.

As depicted in the diagram, motorists will be detoured from just north of the Rancho Bernardo Road off-ramp onto either the median lanes, or the far right lanes. The far right lanes are used to access the on- and off-ramps to Bernardo Center Drive and Camino Del Norte.

Signs will be posted in multiple key locations to guide motorists through the detours.

Caltrans will make every effort to minimize any disruption to the public during this construction. For information on this and other project closures, motorists may phone the I-15 Managed Lanes Hotline at (866) 890-1397.

This work is part of a \$428 million effort to build the "Middle Segment" of the I-15 Managed Lanes freeway improvement project. When completed and opened to traffic mid-2008, the freeway will feature state-of-the-art lanes in the roadway median, which will service carpools, multi-occupant vehicles and transit. Single-occupant vehicles will also have access to the managed lanes for a fee.
